

SafePulse Sales Pitch

SafePulse — The All-in-One Service Business OS

Powered by Frantz Enterprise

Stop juggling 5 apps. Run your entire service business from one dashboard.

The Problem

You're a locksmith, safe tech, HVAC pro, plumber, or any mobile service business. Right now you're using:

- A separate scheduling app
- A separate invoicing tool
- A separate customer CRM
- Paper estimate forms
- Scattered text messages for dispatch
- Maybe a clipboard for service notes

That's 5+ tools to run one business. You're losing time, losing leads, and losing money.

The Solution: SafePulse

SafePulse is a **single, unified platform** that handles everything from first customer contact to final payment — all from your phone or desktop.

Complete Feature List

☐ Triage & Dispatch

Feature	Description
Symptom-Based Triage	Customer selects symptoms → instant risk score & recommendation
Photo Upload	Customer submits photos of the problem before you arrive
Map & Fee Calculator	Automatically calculates distance-based trip fees
Popup Alerts	Battery warnings, damage risks, and custom messages fire automatically

Email Dispatch (EmailJS)	Auto-send customer confirmation + tech report via email
SMS Dispatch	One-tap SMS with full tech report to technician
Multi-Tech Support	Assign jobs to specific techs, track who's handling what
Technician Report	PDF report with symptoms, photos, score, estimate, and notes

□ Triage History & CRM

Feature	Description
Triage History Log	Complete customer lookup — see every past triage, job, and note
Copy Report	One-tap copy of full tech report to clipboard
PDF Export	Downloadable PDF report for customer records
Customer Portal	Customer login to view their past reports and job history
Customer Notifications	Auto SMS/email status updates (en route, arrived, completed)
Lead Source Tracking	Tag every lead source: referral, web search, phone call, walk-in

□ Financial Suite

Feature	Description
Invoicing	Generate & send professional invoices with your branding
Estimates	Create detailed service estimates, email directly to customer
Receipts	Auto-generate payment receipts upon completion
Labor & Services Catalog	Pre-defined labor categories with hourly rates & service codes
Parts Catalog	Manage parts inventory with pricing, categories, and reorder alerts
Stripe Payments	Accept credit cards online — invoices paid instantly
Tax Calculator	Auto-calculate state & local sales tax per job location
Discounts & Coupons	Create promo codes, seasonal offers, and referral discounts
	Export jobs to QuickBooks, CSV,

☐ Operations & Workforce

Feature	Description
User Roles	Admin, dispatcher, technician, customer — each sees only what they need
Dispatch Board	Live view of all active jobs, assign and reassign instantly
Technician Status	Real-time arrival/completion tracking per job
Timesheets	Tech clock-in/clock-out with GPS and job association
Commission Tracking	Auto-calculate per-job commissions for techs
Vehicle Tracking	Assign vehicles to techs, track service area coverage
Equipment Checklist	Pre-job gear verification — safe open kit, tools, lock parts
Purchase Orders	Create and approve POs for supply orders
Vendor Directory	Store all supply vendor contacts, pricing, lead times

☐ Analytics & Marketing

Feature	Description
Analytics Dashboard	Charts: triages per day, common symptoms, revenue, tech performance
Marketing Emails	Send campaign blasts to your customer list
Review Requests	Auto-request Google & Yelp reviews after job completion
Loyalty Program	Points-based rewards for repeat customers
Lead Source Analytics	See which channels bring the most profitable jobs

☐ Compliance & Legal

Feature	Description
Contract Templates	Service agreement templates with e-sign capability
Certification Tracking	Monitor tech license & cert expirations

Audit Log	Every action recorded — who did what, when
WCAG 2.1 AA Accessibility	ADA-compliant interface (screen reader, contrast, keyboard nav)

Admin Control

Feature	Description
Feature Toggle System	Turn every feature on/off instantly — sell different tiers without rebuilding
White-Label Branding	Custom colors, logo, company info, domain
Multi-Language	Spanish & other languages (toggleable)
Dark Mode	Light/dark theme toggle for night work
Full Admin Panel	All settings, config, and integrations from one place

Who Needs This?

- **Locksmiths** — Dispatch safe techs, track lockout calls, manage key cutting jobs
- **Safe Technicians** — Triage safe symptoms, risk-score before driving out
- **HVAC Companies** — Triage AC/heating issues, dispatch techs with right parts
- **Plumbers** — Customer symptom intake, estimate, dispatch, invoice
- **Appliance Repair** — Same flow: triage → dispatch → fix → invoice
- **Garage Door Services** — Spring issues, opener diagnostics, dispatch
- **Pool Service** — Chemical imbalance triage, filter diagnostics
- **IT Support** — Remote triage, on-site dispatch, parts tracking
- **Any Mobile Service Business** — If you send a tech to a customer, this is for you

Pricing Tiers (Coming Soon)

Tier	Price	Best For
Free	\$0	Sole proprietor testing the waters
Starter	\$29/mo	Single tech, 50 jobs/mo
Pro	\$59/mo	2-5 techs, all features

Enterprise

\$99/mo

Unlimited techs,
priority support,
white-label

What Techs Are Saying

"I showed this to Kevin at NorCal Safe & Vault and he loved it — even in its present state." — **Robert Frantz**, Frantz Locksmith Service

"Finally, everything in one place instead of five different apps." — **Beta Tester feedback**
